

# EV360 Battery Health Certificate

Independent EV battery check summary

EV360-001342

**Battery Health**

**96%**

**Range**

**450km**

Based on diagnostic data captured at the time of inspection.

## Vehicle Details

Make	Polestar
Model	2
Year	2023
VIN	YSMEP3KA4NL123456

Odometer	42,350 km
Battery	78 kWh
Registration	ABC123
Test Date	18 May 2026

## Battery Summary

Battery Status	Excellent	Battery Type	Lithium-ion
State of Charge Test	96.40%	Test Method	Diagnostic scan

## Battery Health Rating

## Checks Complete

- ✓ Battery management system data reviewed
- ✓ High-voltage battery condition assessed
- ✓ Estimated range recorded
- ✓ Vehicle diagnostic scan completed
- ✓ Key battery performance indicators checked

## Verify Certificate

Scan to verify certificate details online.

This certificate provides a clear snapshot of the vehicle's battery condition using diagnostic data collected at the time of inspection. It is designed to help EV owners, buyers and sellers better understand the current health of the vehicle's high-voltage battery. Results are based on available vehicle data at the time of testing. Battery performance may vary depending on usage, charging habits, temperature, software and vehicle condition. This certificate does not guarantee future battery performance.
